

FULLY AUTOMATE YOUR REFURBISHMENT PROCESS

ERASE & REFURB 2x AS FAST

Device Link connects directly to the MacBook to **erase and refurbish in half the time of repetitive manual processes**. Our automation software saves labor and processing time while improving the efficiency, quality, and security of refurbished MacBooks.

NO TRAINING NEEDED

Device Link connects to a MacBook and takes control. **No need for experienced operators with detailed knowledge of the Apple process**, Device Link speeds through erasure and configuration steps automatically performing complete data deletion and refurbishment.

FULLY AUTOMATED

Connect Device Link to the MacBook and let it do the work. This groundbreaking technology uses AI and image processing techniques for a turnkey solution that **automates the complete data deletion and refurbishment of MacBooks and more**.

FOLLOWS MAC PROCESSES

Device Link adheres to the security practices recommended by Apple for MacBook resale and returns. **Compatible with new Apple M1 chips and Intel chips T1 and T2**, Device Link checks for activation locks and reinstalls the MacOS.

ELIMINATE RISK

Precision automation eliminates risk of defective products or devices with personal information on store shelves.

SECURE ERASURE

All user data is securely erased to industry standards NIST SP 800-88 R1 Guidelines for Media Sanitization.

DESIGNED FOR YOU

Designed for refurbishers, IT asset disposal processors, OEMs, data centers, and enterprise IT asset managers.

MACBOOKS AND MORE

Device Link works on MacBook, Mac Pro, Mac Mini, Mac Studio, and gaming consoles like the Xbox.

REPORT AND CERTIFICATION

Final report uploaded to our Customer Portal where you can receive data in real-time.

FULLY AUTOMATE YOUR REFURBISHMENT PROCESS

EVERYTHING YOU NEED:

WHAT'S IN THE BOX

- 1x Device Link
- 1x Power supply, 5V, 4A DC
- 1x micro HDMI to HDMI cable
- 1x micro USB to USB-A cable
- 1x USB-C to USB-A cable
- 1x 3 port USB hub
- 1x HDMI cable
- 1x USB-C Digital AV Multiport Adapter

DIMENSIONS

- Length: 121mm / 4.76in
- Width: 90.5mm / 3.56in
- Height: 45mm / 1.77in
- Weight: 2.2 lbs / 1kg

HOW IT WORKS

Device Link has everything packaged into **one simple solution**: software, licensing, configuration, and reporting.

Device Link **connects directly to the MacBook** and runs a suite of diagnostic tests to check the MacBook and its battery life are in good working condition.

The automation software **captures all necessary system information, detects activation locks, checks battery life,** and performs total, secure cryptographic erasure with just a few clicks.

Device Link has the option to run manual hardware tests to **inspect the MacBook's webcam, microphone, speakers, keyboard, and trackpad.**

All test and erasure information is included in an **electronic report that is immediately available** from Device Link or the Customer Portal and an optional production label can be generated to work with your internal process.

Go to ziperase.com for more brilliantly easy data erasure solutions for laptops, desktops, servers, MacBooks, and loose drives.
