

Device Link for Chromebook

Quick-Start Guide 1

Station Setup

What You Need:

- 1 x internet connection, Wi-Fi or ethernet (for target Chromebook)
- 1 x internet connection, Wi-Fi or ethernet (for Device Link)
- HDMI monitor (needed for setup, optional for processing)
- USB mouse and keyboard (needed for setup, optional for processing)
- 1 x Chromebook target with its own power supply

Good to Know:

- Device Link operates as an Internet-connected appliance. Licensing and reporting functions occur with direct communication to the Ziperase [Customer Portal](#).
- Device Link supports 64-bit Chromebooks and Chromeboxes produced after 2015 supporting USB-C
- All units report completed activities directly to the cloud, where they are aggregated with reports from all of your other Device Link stations
- Licensing is managed entirely in the [Customer Portal](#), transparently to the operator.
- Our support team is here to help! Email us at support@ziperase.com or fill in [this form](#) to create a ticket for technical support.
- Check for software updates in the [Customer Portal](#) Downloads tab

Cables and Connections You'll Need

- 1.** Device Link USB-C Power Adapter
