

Device Link for MacBook Quick-Start Guide 2 First Start

Before starting this guide, please follow Device Link Quick-Start Guide 1 - Station Setup

• Power on Device Link Unit by pressing the power button on the front of the box

- When Device Link is booted and ready, you'll see the main GUI
- Navigate to the Manage tab

2 • Under the Manage tab, find and take note of the Station name

Software Version License Device Class Date and Time Network Print Station name ziperase-bb9cfb00 Change Internet access Connected Change	Tasks	Settings	Reports	Mana	age				
Station name ziperase-bb9cfb00 Change Internet access Connected				Software Version	License	Device Class	Date and Time	Network	Printer
Internet access Connected			•	Station name		ziperase-bb9	cfb00	Chang	е
				Internet access		Connected			

Important things to know about the Station name:

- It includes the serial number of the Device Link box (in this example, bb9cfb00)
- The Station name is printed on the Device Link unit and is **included in final device reports**, issue reports sent to Ziperase, and for various network connections
- The Station name is the hostname for the Device Link unit, and is advertised on the local network via multicast DNS (mDNS)
- Network setup permitting, you can identify and connect to the station from any other browser on the local network by connecting to http://ziperasebb9cfb00.local:8086 (replace bb9cfb00 with your current serial number)
- The Station name must be uniquely identifying for each station
- While you're here, check to see you're connected to the internet

That's it! You're all set up and ready to go. Next up: How to process a Mac in 3 easy steps!

Processing a Mac in 3 Easy Steps

IMPORTANT: Follow these steps BEFORE connecting the MacBook to be erased

- Navigate to the Tasks page on the Device Link station
 - Click Start a new Mac...
 - This starts a new session that isn't terminated until Fail or Pass are pressed

	Tasks	Settings Reports	Advano	ed Manage		
			Start a n	ew Mac		
Seria CPU CPU Mem	l Model Speed hory			Battery Health Battery Cycles GPU 1 Model GPU 2 Model Security Lock		
		Fail			Pass	
			ST	'OP		
1	Boot MacOS	S Recovery		NOT STARTED		→I]
2	Erase Mac			NOT STARTED		→I]

Time to connect the MacBook for erasure

- Connect the appropriate cables to the target MacBook and make sure it is
 powered off
 - On the Tasks page, click the 🗍 on row 1

Task	k s Settings Reports	Advanced Manage	
		Start a new Mac

		STOP	
1 Boo	ot MacOS Recovery	NOT STARTED	-+
2 Era	ise Mac	NOT STARTED	→I]

- If you see a **yellow** alert pop-up, Device Link needs an operator to do something
- A red alert pop-up indicates an error or warning
- Device Link will display a message in each instance to tell you what the issue is
